

FOR IMMEDIATE RELEASE

Leader in AdvancedTCA Switching Announces General Availability of 10G Switch

ATS1936 – New ATCA 3.1 Compliant Switch for Diversified Technology, Inc.

NXTCOMM, Chicago, IL – June 19, 2007 – Diversified Technology, Inc. announces general availability of their low cost, highly functional, and flexible ATS1936 Switch Blade. The board features 10G Ethernet transfer speeds.

“With our third generation of Ethernet based ATCA switching, we focused on offering flexibility through 10G capabilities and multiple AMC sites” stated Joe McDevitt, DTI’s VP of Technical Marketing. “Our customers have come to rely on us as the Leader in the AdvancedTCA switch market and we are constantly striving to provide them with the performance increase they require in their programs. In addition to our three levels of Ethernet based hubs that includes 1G and base only, we also offer an InfiniBand switch to compliment our multiple CPU blades and fully integrated Rackmount Platforms. DTI believes the switch is the cornerstone of an ATCA system and our solutions are built around that philosophy, including this new 10G ATS1936.”

About the ATS1936

The ATS1936 provides separate control plane and data plane switching for ATCA platforms. It provides 1Gb Ethernet switching on the 3.0 Base Fabric with both 1G and 10G uplink ports. The 3.1 Expansion Fabric provides 1Gb and 10Gb Ethernet with 1G/10G uplink ports. In addition to the three AMC sites and the front panel ports, the ATS1936 supports an RTM for greater access and further expandability. Both of the Base and the Fabric networks are fully managed with the robust management suite reducing issues integrating your ATCA platforms with the outside world. Both networks support Layer 2 switching as well as Layer 3 routing and IPV6. Visit DTI’s website for more details on the ATS1936 and to download the product’s technical datasheet.

Availability

Production shipments begin June 2007. Call DTI Sales for single piece pricing and quantity discounts.

About Diversified Technology, Inc.

Diversified Technology, Inc. (DTI) is the leading switch provider in the ATCA market and offers a cohesive approach for their customers. This cohesive approach is facilitated by DTI working hand-in-hand with companies to ensure the best performance, highest reliability, shortest time-to-market and efficient use of DTI’s ATCA hardware in their program’s embedded application.
